Q.10 Write Precis of the following –

Education means knowledge, which leads to liberation from ignorance. The role of education is an immense importance. Many countries have made provisions for the right to education in their national constitutions. While the right to education is universally recognized, the way it is interpreted at national level differs substantially. Both at national and international levels efforts are being made to educate more and more people, various initiatives are being taken at Global Scenario to ensure all children of primary school age would have to participate in free schooling of acceptable quality and the gender disparities in schooling would be eliminated. But inspite of all the commitments made by Government under international instruments as well as having so many provisions, policies and programmes at national level for providing education for all, especially free and compulsory basic education, millions of children still remain deprived of educational opportunities, many of them on account of poverty. India is placed in the list of the countries that are providing education partially. Achieving the right to basic education for all is one of the biggest moral challenges of present time.
